## Professional Summary

Full-stack Software Engineer with 4 years of professional experience building production web applications in Angular, TypeScript, React and Node.js, with Java and Spring Boot on the backend. Most recently, I built and shipped Life Tracker, a full-stack React and PostgreSQL application with Docker and a GitHub Actions pipeline, and completed an M.Sc. thesis that implemented Gumti, a consensus protocol, on Apache Flink. Earlier work includes a live, WCAG 2.1 AA-compliant government website and a 33% load-time reduction. Comfortable owning a feature from design through CI and release.

## Core Skills

**Frontend:** JavaScript, TypeScript, Angular, React, Next.js, HTML5/CSS3, Tailwind CSS, SASS, WordPress
**Backend and Data:** Java, Spring Boot, JPA, Node.js, REST APIs, PostgreSQL, Prisma, PHP
**Tools and Other:** Git, Docker, GitHub Actions (CI/CD), WCAG 2.1 AA, Figma, GitHub Copilot, Claude Code

## Experience

**Independent projects and skill development** (Life Tracker, Next.js portfolio), Bamberg 09/2026 - present

**Working Student - Software Engineer** 04/2023 - 07/2023
*automaited, Cologne, Germany*
- Developed **selector-generation logic** in TypeScript that identifies buttons and inputs by walking the DOM tree
- Wrote tests to check detection on 50+ real-world pages from restaurant, hotel and HubSpot websites

**Software Engineer** 07/2019 - 08/2022
*Genweb2 Ltd, Dhaka, Bangladesh*
- Cut an application's loading time by over **33%** by refactoring its architecture and optimizing the bundle
- Built **Angular** user interfaces in a cross-functional Agile team
- Worked with persons with disabilities to make the interfaces accessible (WCAG 2.1 AA)

**Web Developer** 05/2018 - 02/2019
*SynergyForce Solutions, Winnipeg, Canada (Remote)*
- Designed the front-end architecture of an employee management application; debugged and tested it

## Selected Projects

**Life Tracker - my own full-stack project | React, TypeScript, Node.js, PostgreSQL** Live | GitHub
- Built on my own: React and TypeScript front end, Node.js REST API, PostgreSQL schema with **Prisma** migrations
- Runs in **Docker**; a **GitHub Actions** pipeline checks every commit

**Master's Thesis - Adapting Stream-Based State-Machine Replication to Apache Flink** GitHub
- Checked whether Tara runs on **Apache Flink**, then designed, implemented and evaluated my own protocol, **Gumti**
- Used ZooKeeper for communication outside the dataflow and TCP loops where Flink's graph is acyclic; the protocol restores the leader and state after Flink restarts a process. Tested throughput, latency and fault tolerance

**EMPORIA - Accessible e-learning and job portal | Angular 8, Spring Boot** Live site
- Built and managed the user interface of a live government website; turned **Figma** designs into pixel-perfect pages
- Met the **W3C WCAG 2.1 AA** accessibility standard, working directly with persons with disabilities

**Arcade - AI Data Optimization Platform | Angular 13, Spring Boot, JPA**
- Designed the **REST APIs** (Spring Boot, JPA) and the relational data model; prepared scraped data for AI/ML
- Built UI features such as **multi-item drag-and-drop clustering**, image magnification and keyboard shortcuts

**BDjobs - Accessibility Audit | WCAG 2.1 AA, Screen Readers** Live site
- Audited the job portal for accessibility barriers (WCAG 2.1 AA, screen readers)
- Wrote the technical documentation and worked with the developers on the fixes

## Education and Languages

**M.Sc. International Software System Science** 04/2022 - 08/2026
*Otto-Friedrich-Universität Bamberg, Bamberg, Germany | thesis 10/2025 - 08/2026*

**B.Sc. Computer Science & Software Engineering** 01/2014 - 12/2017
*American International University-Bangladesh, Dhaka, Bangladesh*
**Languages:** English C1 German A2
